

Notice of Allowability

Application No.

09/808,852

Applicant(s)

TANAKA ET AL.

Examiner

Christopher Onuaku

Art Unit

2616

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to the amendment filed 7/18/05.
2. ☒ The allowed claim(s) is/are 1-12.
3. ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some* c) ☐ None of the:
- ☒ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.

THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

4. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
- (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
- 1) ☐ hereto or 2) ☐ to Paper No./Mail Date _____.
- (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.
- Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 are allowable over the prior art of record.
2. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, the invention relates to an information reproducing apparatus, an image display control method and a recording medium, including apparatus adapted for facilitating video data editing by displaying marks that indicate start points and end points of video data to be edited.

The closest reference Shore et al (US 5,760,767) disclose the editing of moving images such as audio/video images, including the user interface that provides sophisticated editing functions that are easy to implement.

However, Shore et al fail to explicitly disclose an information reproducing apparatus, where the apparatus comprises whereby the controller controls the display of a menu of editing commands and an indication of available commands from among the editing commands and an indication of available commands from among the editing commands, the available commands being determined according to the state of the stored image signal start points and end points.

Regarding claim 5, the invention relates to an information reproducing apparatus, an image display control method and a recording medium, including apparatus adapted for facilitating video data editing by displaying marks that indicate start points and end points of video data to be edited.

The closest reference Shore et al (US 5,760,767) disclose the editing of moving images such as audio/video images, including the user interface that provides sophisticated editing functions that are easy to implement.

However, Shore et al fail to explicitly disclose an image display control method, where the method comprises whereby a menu of editing commands is displayed and an indication of available commands from among the editing commands is also displayed, the available commands being determined according to the state of the stored image signal start points and end points.

Regarding claim 9, the invention relates to an information reproducing apparatus, an image display control method and a recording medium, including apparatus adapted for facilitating video data editing by displaying marks that indicate start points and end points of video data to be edited.

The closest reference Shore et al (US 5,760,767) disclose the editing of moving images such as audio/video images, including the user interface that provides sophisticated editing functions that are easy to implement.

However, Shore et al fail to explicitly disclose a storage medium recorded with a computer-readable program, where the program further whereby a menu of editing

Art Unit: 2616

commands is displayed and an indication of available commands from among the editing commands is also displayed, the available commands being determined according to the state of the stored image signal start points and end points.

Regarding claim 10, the invention relates to an information reproducing apparatus, an image display control method and a recording medium, including apparatus adapted for facilitating video data editing by displaying marks that indicate start points and end points of video data to be edited.

The closest reference Shore et al (US 5,760,767) disclose the editing of moving images such as audio/video images, including the user interface that provides sophisticated editing functions that are easy to implement.

However, Shore et al fail to explicitly disclose an information processing apparatus, where the apparatus comprises whereby the controller controls the display of a menu of manipulating commands and an indication of available commands being from among the manipulation commands, the available commands being determined according to the state of the stored parameter.

Regarding claim 11, the invention relates to an information reproducing apparatus, an image display control method and a recording medium, including apparatus adapted for facilitating video data editing by displaying marks that indicate start points and end points of video data to be edited.

The closest reference Shore et al (US 5,760,767) disclose the editing of moving images such as audio/video images, including the user interface that provides sophisticated editing functions that are easy to implement.

However, Shore et al fail to explicitly disclose an image display control method where the method comprises the step whereby a menu of manipulating commands is displayed and an indication of available commands from among the manipulation commands is also displayed, the available commands being determined according to the state of the stored parameter.

Regarding claim 9, the invention relates to an information reproducing apparatus, an image display control method and a recording medium, including apparatus adapted for facilitating video data editing by displaying marks that indicate start points and end points of video data to be edited.

The closest reference Shore et al (US 5,760,767) disclose the editing of moving images such as audio/video images, including the user interface that provides sophisticated editing functions that are easy to implement.

However, Shore et al fail to explicitly disclose a storage medium recorded with a computer-readable program for performing a data display control method, where the method comprises the step whereby a menu of manipulating commands is displayed and an indication of available commands from among the manipulation commands is also displayed, the available commands being determined according to the state of the stored parameter.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Onuaku whose telephone number is 571-272-7379. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on 571-272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

NOTE: Effective July 15, 2005, the Central Fax Number will change to 571-273-8300. Faxes sent to the old number (703-872-9306) will be routed to the new number until September 15, 2005.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
